In 2010, 10,000+ patients told us what they want.
SHARE
97%
Allow different providers to access same information about a patient to improve care.

96%
Make sharing information with providers more convenient for patients.
CONTROL
91%
Allow patients to enter information about their physical health for providers to review.

87%
Allow patients the ability to see their own medical information in the same way that providers do.
